ARTEMIS ADVENTURE

With LEGO® Bricks

Explore space science, innovation, and creativity through LEGO® bricks in this interactive exhibition.

Explore the Artemis Missions and ignite your creativity and STEAM skills with LEGO activities. Step into the exciting frontiers of space, from lunar exploration to Mars colonization, and experience the thrill of learning about science and space in a fun and interactive way.

Using the iconic bricks as learning tools, the exhibition encourages innovative thinking, making it a perfect platform for families, educators, and individuals interested in science, space, and creativity.

Exhibition Themes

- Learning Through Play with LEGO Bricks
- Exploring the Unknown
- Expanding the Human Experience
- Persevering Through Challenges to Pursue a Better Future

Artemis Adventure with LEGO® Bricks is a traveling exhibition produced and toured internationally by Flying Fish with support from Science World British Columbia.
